about me

why collage?

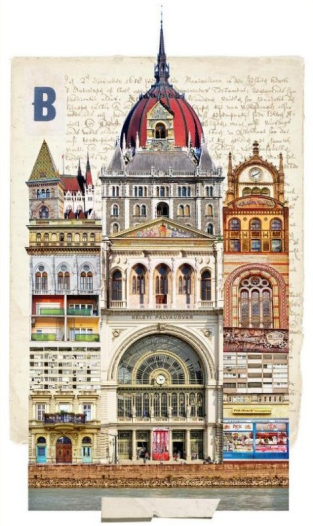

“The idea of collage comes from the need to give the detail a new role. A cut-out that was once part of an image becomes the protagonist of a new story.”

- Author of the book series “Collage letterario della città”, published by Il Palindromo
- Recommended artisan in the Homo Faber Guide
- Works dedicated to cities in Italy and around the world, from Genoa to Budapest

the language

a recognisable style.

the method

from fragment to artwork.

Hundreds of fragments, chosen, cut out and recomposed. The same method can give shape to your brand, your headquarters or your city.
